

Availability: fail-open media, fail-closed actuation

Worker at capacity

Shed the new call_id. Return MONITOR. Spend no CPU.

Worker crash

In-call belief is lost (ephemeral). RTP still flows on the SBC.

ASR circuit open

Linguistic freezes. Acoustic + agent keep running.

Frame time > SLO

Ready=false. Load balancer drains. Live calls finish.

Call availability is owned by the SBC. Detector unavailability is not a dropped call.
